PROFESSIONAL SUMMARY

Computer Science undergraduate with practical experience building AI-powered and full-stack web applications using the MERN stack. Strong in backend engineering, RESTful API development, and secure authentication. Passionate about integrating AI, building scalable systems, and delivering production-ready applications.

PROJECTS

Nightlamp – AI-Powered Application Diagnostic Engine

[GitHub](#)

React.js, Node.js, Express.js, Google Gemini 2.5 Flash API, CSS

- Developed an AI diagnostic engine analyzing live URLs, GitHub repos, and error logs to detect six failure categories including broken webhooks, expired tokens, and schema drift.
- Engineered an Express.js backend with automatic model fallback (Flash → Flash-lite → 2.0) for reliability under API rate limits; generated plain-English diagnostics with copy-ready code patches.

DS ClipIt – Full Stack Social Media Platform

[Live](#)

MongoDB, Express.js, React.js, Node.js, JWT, Redux Toolkit, Tailwind CSS

- Developed a production-style social media platform with authentication, posts, comments, and likes; architected secure RESTful APIs with JWT, route protection, and structured middleware.
- Designed optimized MongoDB schemas for user-generated content; managed global state with Redux Toolkit to minimize unnecessary re-renders.

ChronicleCave – Content Publishing Platform

[Live](#)

React.js, Appwrite, Tailwind CSS

- Developed a content platform with rich-text editing, authentication, CRUD operations, and role-based authorization; integrated Appwrite BaaS for auth, database, and file storage.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), Python, Java
Frontend	React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS
Backend	Node.js, Express.js, REST APIs, JWT Authentication
Database	MongoDB, SQL
Developer Tools	Git, GitHub, Vercel, Postman
Core CS	Data Structures and Algorithms, Computer Networks, DBMS , Linux

EDUCATION

B.Tech in Computer Science and Engineering

2023 – 2027

Narasaraopeta Engineering College, Andhra Pradesh

CGPA: 8.47/10

TECHNICAL ACHIEVEMENTS

HENNGE Backend Challenge

2026

- Cleared a competitive global challenge under strict constraints (no loops, no list comprehensions); implemented TOTP (RFC6238) with HMAC-SHA512 and HTTP Basic Auth from scratch in Python.

Google Gemini Hack Day – Top 10 Finish

[Certificate](#)

- Ranked top 10 among participating teams; designed and shipped a fully functional AI diagnostic product overnight under hackathon constraints.

Logitech X WHO Master Hackathon – Zonal Round

[Certificate](#)

- Advanced to the Zonal Round of the Logitech X WHO Master Hackathon after clearing the qualifying stage.

Problem Solving

[LeetCode Profile](#)

- Achieved 200+ problem solutions on LeetCode with recognized consistency milestones such as 50-Day and 100-Day badges.

CERTIFICATIONS
